THE

AMERICAN JOURNAL

OF

SCIENCE AND ARTS.

EDITORS AND PROPRIETORS,

PROFESSORS JAMES D. DANA AND B. SILLIMAN.

ASSOCIATE EDITORS,

PROFESSORS ASA GRAY AND WOLCOTT GIBBS,

OF CAMBRIDGE,

PROFESSORS H. A. NEWTON, S. W. JOHNSON,
GEO. J. BRUSH AND A. E. VERRILL,

OF NEW HAVEN,

PROFESSOR A. M. MAYER, OF HOBOKEN, N. J.

THIRD SERIES.

VOL. VI.—[WHOLE NUMBER, CVI.]

Nos. 31—36.

JULY TO DECEMBER, 1873.

WITH THREE PLATES.

NEW HAVEN: EDITORS.
1873.

PRINTED BY TUTTLE, MOREHOUSE & TAYLOR, 221 STATE ST.

CONTENTS OF VOLUME VI.

NUMBER XXXI.

Page

ART. I.—William S. Sullivant: A Biographical Notice, ... 1

II.—On some results of the Earth's Contraction from cooling; Part II, The Condition of the Earth's Interior, and the connection of the facts with Mountain-making; III, Metamorphism; by JAMES D. DANA, ... 6

III.—Photography of Southern Star-Clusters; by C. S. SELLACK, 15

IV.—Meteoric Iron found near Shingle Springs, Eldorado Co., California; by B. SILLIMAN, ... 18

V.—Contributions to Mineralogy; by ALBERT R. LEEDS, ... 22

VI.—Indian Mounds and relics on the Coast of Oregon; by A. W. CHASE [wrongly printed H. A. CHASE], ... 26

VII.—A local Thunder Storm; by GEORGE SUTTON, ... 32

VIII.—The Diagonal System in the Physical Features of Michigan; by A. WINCHELL, ... 36

IX.—Notices of recent Earthquakes; by C. G. ROCKWOOD, Jr., 40

X.—A convenient Eye-piece Micrometer for the Spectroscope; by O. N. ROOD, ... 44

XI.—Adam Sedgwick, ... 45

XII.—Discovery of a new Planet, (131); by C. H. F. PETERS, 51

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—New Determination of the Velocity of Light, CORNU, 52.—Activity of Chlorine in the dark, MELSENS: Preparation of Chromic Trioxide, DUVILLIER: Synthesis of Propionic acid, BERTHELOT: Formation and decomposition of Ketones, STAEDEL, 53.—Synthesis of Right and Left Tartaric acid, JUNGFLEISCH, 54.—Synthesis of Tryosin, LADENBURG: A Treatise on Electricity and Magnetism, JAMES C. MAXWELL, 55.—Wöhler's Outlines of Organic Chemistry, R. FITTIG, 56.

Geology and Mineralogy.—The Klamath River Mines, remarkable gravel deposits of the Lower Klamath, a sketch of their Geology, A. W. CHASE, 56.—The Great Basin, JAMES BLAKE, 59.—"Lignitic Formation" of the Rocky Mountains: The Eozoon Canadense, J. W. DAWSON. 60.—Elephas Americana in Mexico, F. R. DIFFENDERFER: Report of the Geological Survey of Ohio, 62.—The Coal Regions of America, JAMES MACFARLANE: Geological Map of the United States, 64.—Sternbergia, Dr. DAWSON: The Story of the Earth and Man, J. W. DAWSON: Revue de Géologie, DELESSE and DE LAPPARENT: Siliceous deposit of the Upper Geyser Basin of Firehole River, F. M. ENDLICH, 66.—Mineralogie della Toscana, A. D'ACHIARDI: Aragotite, Metacinnabarite, F. E. DURAND, 67.

Zoölogy and Botany.—The Megalops stage of Ocypoda, S. I. SMITH, 67.—Corals and Coral Islands, by J. D. Dana; reply to the criticism of P. Martin Duncan, 68.—Principles of Animal Mechanics, SAMUEL HAUGHTON, 74.—Check-list of the Ferns of North America north of Mexico, JOHN ROBINSON: Flora Brasiliensis of von Martius, Prof. EICHLER, 75.—A Monograph of Ebenaceæ, W. P. HIERN: Dodecatheon Meadia, 76.—E. Regel, Animadversiones de Plantis vivis nonnullis Hort. Bot. Imp. Petropolitani, 77.

Astronomy.—Astronomical and Meteorological Observations made during the year 1870 at the U. S. Naval Observatory: Aurora Australis, 77.

Miscellaneous Scientific Intelligence.—Earthquake wave of August 14th, 1868, and the depth of the Pacific, J. E. HILGARD, 77.—The Challenger Expedition: Mich-

igan University, 78.—British Association: Report of the Superintendent of the U. S. Coast Survey, for 1869: Year-book of Nature and Popular Science for 1872, JOHN C. DRAPER: Annual Record of Science and Industry for 1872, SPENCER F. BAIRD, 79.—Reptiles and Birds: Views of Nature, EZRA C. SEAMEN: A Manual of Photography, GEORGE DAWSON, 80.—*Obituary.*—Christopher Hansteen, 80.

NUMBER XXXII.

Page

ART. XIII.—On the effects of Magnetization in changing the Dimensions of Iron and Steel bars, and in increasing the Interior Capacity of Hollow Iron Cylinders; by ALFRED M. MAYER. Part II, ... 81

XIV.—On some results of the Earth's Contraction from cooling; Part IV, Igneous Ejections, Volcanoes; by JAMES D. DANA, ... 104

XV.—Researches on the Hexatomic compounds of Cobalt; by WOLCOTT GIBBS, ... 116

XVI.—Mineralogical Notes on Utah, California and Nevada, with a description of Priceite, a new Borate of Lime; by B. SILLIMAN, ... 126

XVII.—Remarks on the Distribution of the Fossils in the Lower Potsdam Rocks at Troy, N. Y., with descriptions of a few new species; by S. W. FORD, ... 134

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On a new Determination of the Earth's Density, CORNU and BAILLE, 140.—On Spectral Lines of Low Temperature, SALISBURY, 141.—On the Solvent power of liquid Carbon Dioxide, CAILLETET: On the Density of the Vapor of Phosphoric Chloride, WURTZ, 142.—On Ethyl-amyl, GRIMSHAW: On a New Synthesis of Aromatic Acids, PATERNÒ, 143.

Geology and Natural History.—On Glacial Movements in Northern New York; by R. P. STEVENS, 144.—Deep-sea chalky deposits but little magnesian: Nummulites and Orbitolites in the Mesozoic, Belemnites in the Eocene, and Ammonites in the Carboniferous: Bed of the Rhine at the falls of Schaffhausen changed in the Glacial era, WURTEMBERGER, 145.—Phosphatic character of the shells of Obolus: Statistics of Mines and Mining in the States and Territories west of the Rocky Mountains for 1871, by R. W. RAYMOND, 146.—Royal Mineralogical Museum in Dresden: Descriptive and Analytical Botany, by LE MAOUT and DECAISNE; translated by Mrs. HOOKER, with additions, appendix, etc., by J. D. HOOKER, 147.—Fly-catching in Sarracenia, 149.—Dionæa: Primitiæ Monographiæ Rosarum, F. CRÉPIN, 150.

Astronomy.—A Catalogue of Auroras observed from 1776 to 1784, in Labrador, CLEVELAND ABBE, 151.—Meteors of November 27, 1872, at Teneriffe, Canary Islands, by O. F. DABNEY, 152.—Observation of Tempel's Comet of Short Period, by M. STEPHAN: On Recent Estimates of Solar Temperature, by JAMES DEWAR, 153.—Meteor seen in Newfoundland, 154.

Miscellaneous Scientific Intelligence.—Flow of Water in Rivers and Canals, by D. FARRAND HENRY, 154.—Death by Lightning, by Rev. HORACE C. HOVEY, 157.—A new and ingenious American Move in the Game of Priority: Transactions of the Academy of Sciences of St. Louis, 158.—A Dictionary of Science, comprising Astronomy, Chemistry, Dynamics, Electricity, Heat, Hydrodynamics, Hydrostatics, Light, Magnetism, Mechanics, Meteorology, Pneumatics, Sound and Statics, edited by G. F. ROCKWELL: Physical Geography, by ARNOLD GUYOT: American Association for the Advancement of Science: Royal Society: Academy of Sciences of Paris, Session of July 7th, 159.—*Obituary.*—John Wells Foster, 159.—Henry James Clarke: Thomas Belden Butler: De Verneuil, 160.

NUMBER XXXIII.

Page

ART. XVIII.—On some results of the Earth's Contraction from cooling; by JAMES D. DANA. Part V, Formation of the Continental plateaus and Oceanic depressions.... 161

XIX.—On a Secondary Spectrum of very large size, with a Contraction for Secondary Spectra; by O. N. ROOD,... 172

XX.—Notes on the Corundum of N. Carolina, Georgia, and Montana, with a description of the Gem variety of the Corundum from these localities; by J. LAWRENCE SMITH, 180

XXI.—The Geology of the Bosphorus..... 186

XXII.—Explorations of 1872: U. S. Geological Survey of the Territories, under Dr. HAYDEN; Snake River Division,.. 194

XXIII.—Contributions from the Sheffield Laboratory of Yale College. No. XXVII.—On the Minerals found at the Tilly Foster Iron Mines, N. Y.; by E. S. BREIDENBAUGH, 207

XXIV.—The discovery of a new Double Star, β Delphini; by S. W. BURNHAM,..... 214

XXV.—Apparatus for Rapid Filtration; by E. W. MORLEY, 214

SCIENTIFIC INTELLIGENCE.

Physics and Chemistry.—On the reflection of Solar heat from the surface of Lake Geneva, L. DUFOUR, 216.—Thermodiffusion, W. FEDDERSEN, 218.—A Cyclopedia of Quantitative Chemical Analysis, FRANK H. STORER, (Part II.) 219.—Sull' Ozono, Note e Riflessioni di GIUSEPPE BELLUCCI, 220.

Geology and Natural History.—The Calorific Value of the Lignites of Western America, R. W. RAYMOND, 220.—The Mineral Region of Lake Superior, 224.—On the Carboniferous Myriapods preserved in the Sigillarian Stumps of Nova Scotia, S. H. SCUDDER, 225.—Dr. Dawson on the Post-pliocene Geology of Canada, 226.—Report of the Geological Survey of the State of New Hampshire, showing its progress during the year 1872, C. H. HITCHCOCK: The Fourth Annual Report on Mines and Mining, ROSSITER W. RAYMOND, 227.—Birds with teeth: The Human Skeleton of the cave near Mentone: Footprints in the Middle Coal Measures at Osage in Kansas: Geological Survey of Kentucky: Geological Survey of Illinois, 228.—Stromatopora: Descrizione Geologica dell' Isola d' Elba, per sevire alla Carta della medesima, di IGINO COCCHI: The European Lobster, Palinurus vulgaris, in the Brighton Aquarium: Mexican Myriapods, 229.—Bentham's Notes on the Classification, History, and Geographical Distribution of Compositæ: A. S. Oersted's System der Pilze, Lichenen und Algen, A. GRISEBACH and J. REINKE: Catalogue of the Phænogamous and Vascular Cryptogamous Plants of Canada, etc., A. H. CURTISS: Botanical Index to all the Medicinal Plants, etc., A. POLLOCK, 230.—New method of observing the rate of growth in plants, E. ASKENASY: General occurrence of Starch in Sieve-cells, Dr. BRIOSI: Influence of Temperature on the development of Penicillium glaucum, Blue Mould, 231.

Miscellaneous Scientific Intelligence.—On the sudden cooling of melted Glass and particularly on "Rupert's Drops," V. DE LUYNES, 232.—Deep Sea Exploration on board "The Challenger:" Petroleum of Upper Burmah, 235.—India-rubber or Caoutchouc of Upper Burmah: Lalande Medal to Prof. Watson, 236.—Meteoric Iron: Pre-Historic Races of the U. S. of America, J. W. FOSTER: Mittheilungen der deutschen Gesellschaft für Natur und Völkeskunde Ostasiens, 237.—Bulletin of the Buffalo Society of Natural Sciences: Academy of Sciences of France: German Association of Naturalists and Physicists: British Association for the Advancement of Science: French Association for the Advancement of Science, 238.—*Obituary.*—Gustav Rose, 238.

NUMBER XXXIV.

Page

ART. XXVI.—Anniversary Address of the President to the Linnean Society, May 24, 1873, ... 241

XXVII.—Chemical Papers from the Massachusetts Institute of Technology.—No. II. The determination of Lead as Peroxide; by W. C. MAY, ... 255

XXVIII.—On the Quartzite, Limestone and associated rocks of the vicinity of Great Barrington, Berkshire Co., Mass.; by JAMES D. DANA, ... 257

XXIX.—De Verneuil. Eulogy of M. DAUBRÉE, June 4, 1873, 279

XXX.—On Isomeric Sulphosalicylic Acids; by IRA REMSEN, 284

XXXI.—On the Silt Analysis of Soils and Clays; by EUG. W. HILGARD, ... 288

XXXII.—Discovery of a new Planet, and observations on that discovered June 13th; by JAMES C. WATSON, ... 296

XXXIII.—Hayden and Gardner's Survey of the Territories, made under the Direction of the Department of the Interior, ... 297

XXXIV.—New Observations on the Dinocerata; by O. C. MARSH, ... 300

SCIENTIFIC INTELLIGENCE.

Physics and Chemistry.—On the Measure of Work in the Theory of Energy; by ROBERT MOON, 301.—Sull' Ozono; Noti e Riflessioni, di GIUSEPPE BELLUCCI, 303.

Geology and Natural History.—Mountain Making, 304.—Cretaceous of Long Island: On the Copper Deposits of the Blue Ridge, 305.—On the Situation and Altitude of Mount Whitney; by W. A. Goodyear, 308.—Sixth Annual Report of the U. S. Geological Survey of the Territories, embracing portions of Montana, Idaho, Wyoming and Utah; being a Report of Progress of the Explorations for the year 1872; by F. V. HAYDEN, 313.—The Geological evidences of the Antiquity of Man, with an outline of Glacial and Post-tertiary Geology, and remarks on the origin of species with special reference to Man's first appearance on the Earth; by Sir CHARLES LYELL: Geological Survey of Wisconsin: Pareira Brava, 315.—OBITUARY.—Elias Durand, 316.

Miscellaneous Scientific Intelligence.—Meeting of the American Association for the Advancement of Science, at Portland, Maine, commencing Wednesday, August 20, 1873, 317.—Popular Lectures on Scientific Subjects; by H. HELMHOLTZ, 319.—Mineral Springs of North America, how to reach and how to use them; by J. J. MOORMAN: Foods, by EDWARD SMITH, 320.

NUMBER XXXV.

Page

ART. XXXV.—The Queen's Chamber in the Great Pyramid; by H. L. SMITH. With Plate II, ... 321

XXXVI.—On the Silt Analysis of Soils and Clays; by EUG. W. HILGARD, ... 333

XXXVII.—On Rocks of the Helderberg era, in the valley of the Connecticut; by JAMES D. DANA, ... 339

XXXVIII.—Letter of Dr. B. A. GOULD, Director of the Cordoba Observatory, ... 353

Page

XXXIX.—On a Modification of the Jagn Vacuum or Filter Pump; by A. E. FOOTE, ... 360

XL.—Chemical Papers from the Massachusetts Institute of Technology.—No. III. On the Synthesis of Hydrocarbons by the treatment of Cast Iron with Acids; by F. H. WILLIAMS, ... 363

No. IV. On the Estimation of Arsenic as Pyroarseniate of Magnesia; by L. F. WOOD, ... 368

XLI.—On Glaciers of the Glacial Era in Virginia; by R. P. STEVENS, ... 371

XLII.—On the Hypsometric work of the U. S. Geological and Geographical Survey of the Territories; by J. T. GARDNER, 373

XLIII.—On a New Arrangement of Shutters for a Dome for an Equatorial Telescope; by EDWARD S. HOLDEN, ... 375

SCIENTIFIC INTELLIGENCE.

Physics and Chemistry.—On the Chemical Activity of Zinc on which Copper has been deposited, GLADSTONE and TRIBE, 377.—On a Method of Estimating Nitric, Chloric and Iodic Acids, THORPE, 378.—On the Theory of the Continuous Chlorine process, DELALANDE and PRUDHOMME, 379.—On a Glycerin of the Aromatic Series, GRIMAUX: Elements of Physical Manipulation; by EDWARD C. PICKERING, 380.

Geology and Natural History.—Results of the Earth's contraction from Cooling, 381.—United States Geological Survey of the Territories under the Department of the Interior, F. V. HAYDEN, 382.—Sphagnum as a Peat-maker, 383.—Challenger Expedition: Reliquiæ Aquitanicæ, by EDOUARD LARTET and HENRY CHRISTY: Note on Huizinga's Experiments on Abiogenesis; by Dr. BURDON-SANDERSON, 384.—Cumacea of the Josephine Expedition; by G. O. SARS: Cumacea from the Arctic Ocean and the West Indies: Monographi over de ved Norges Kyster Forekommende Mysider; by G. O. SARS, 387.—The Composition of Lichenes; by E. BORNET, 388.—Rubus deliciosus Torr.: Spiranthes Romanzoviana, 389.—Hybridation in Mosses affecting the Sporangium, etc. of the Female parent: Normal Formation of fatty substances in Chlorophyll: by G. BRIOSI: Physiological Researches in regard to Germination; by PH. VAN TIEGHEM, 390.

Astronomy.—Note on the Meteors of November 14th; by DANIEL KIRKWOOD: Recently discovered Comets, 392.—Spectroscopic observations of Borelly's and Henry's Comets, 393.

Miscellaneous Scientific Intelligence.—Deep Sea Exploration, 394.—On the Electrical Phenomena which accompany the Contractions of the Leaf of Dionæa muscipula; by Dr. BURDON-SANDERSON, 396.—Ascent of Mount Whitney by Messrs. Rabe, Crapo, Hunter and others; by W. A. GOODYEAR: Annual Report of the Board of Regents of the Smithsonian Institution, for the year 1871: Late Meeting of the American Association, 397.—Critiques and Addresses; by T. HENRY HUXLEY: Volcanic Energy; by ROBERT MALLET: The Unity of Natural Phenomena: Comets and Meteors; by DANIEL KIRKWOOD, 398.—*Obituary.*—Lewis White Williams: Prof. Donati: M. Coste: Prof. Czermak, 398.

APPENDIX.—Star Photographs at Cordoba; by B. A. GOULD, 399.

NUMBER XXXVI.

Page

ART. XLIV.—On Diffraction Spectrum Photography; by HENRY DRAPER, ... 401

XLV.—Notes on the West Virginia Asphaltum Deposit; by WM. M. FONTAINE, ... 409

XLVI.—On the Magnetic permeability and the Maximum of Magnetism of Iron, Steel and Nickel; by H. A. ROWLAND, 416
XLVII.—On the Geology of Western Wyoming; by THEO. B. COMSTOCK, 426
XLVIII.—The Number of Classes of Vertebrates and their Mutual Relations; by THEODORE GILL, 432
XLIX.—Brief Contributions to Zoölogy, from the Museum of Yale College. No. XXV. Results of Recent Dredging Expeditions on the Coast of New England. No. 3; by A. E. VERRILL, 435
L.—Age of the Rocky Mountain Coal or Lignitic Formation, 441

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the Velocity of Sound in Gases as a means of determining their Molecular Weights, BENDER, 450.—On the existence of Sulphurous Chloride, 451.—On Sulphur Oxytetrachloride, MICHAELIS and SCHIFFERDECKER, 452.—On the Isomerism of the Lactic acids, WISLICENUS, 453.—On the Synthesis of a new Propionic acid, BERTHELOT, 454.—On a new constituent of Urine, BAUMSTARK: On the Passage of gases through Colloid membranes of vegetable origin, BARTHÉLEMY, 455.—Relation between the atomic weight, the specific gravity and the hardness of the metallic elements, BOTTONE: On a periodicity of Cyclones and Rainfall in connection with the Sunspot periodicity, C. MELDRUM, 457.—Secondary Currents and their Applications, GASTON PLANTE, 458.—Sound and Music: A non-mathematical Treatise on the Physical Constitution of Musical Sounds and Harmony, including the chief acoustical discoveries of Professor Helmholtz; by SEDLEY TAYLOR, 459.—Objections to the views of Mr. Moon; by R. J. ADCOCK, 460.—Chemistry; by C. L. BLOXHAM, 461.

Geology and Natural History.—Contributions from the Laboratory of the University of Pennsylvania. No. 1. Corundum, its alterations and associated minerals; by F. A. GENTH, 461.—Geological Survey of Illinois, A. H. Worthen, Director, Vol. V: Report of the Geological Survey of Ohio, Part II of Vol. I, 462.—United States Geological Survey of the Territories. F. V. HAYDEN, Geologist in charge, 463.—Synopsis of New Vertebrata from the Tertiary of Colorado, obtained during the summer of 1873; by E. D. COPE: Precious opal from a new Mexican locality, 466.—Movements of the Glands of Drosera; by A. W. BENNETT: Fly-catching in Sarracenia, 467.—Engelmann; Notes on the Genus Yucca, 468.—On some remarkable forms of animal life from the Norwegian Coast, partly from posthumous manuscripts of the late Professor Sars, 470.—Bidrag til Kundskaben om Norges Hydroider, 471.

Miscellaneous Scientific Intelligence.—On the Earthquake of October, 1871, and on a swarm of Locusts at Cordoba, 471.—Remarks on the chemical analyses of samples of soil from Bermuda, by J. H. LEFROY: Report of the Director of the New York Meteorological Observatory, for 1872: Gift of Mr. Ario Pardee to Science: Rocky Mountain Observatory, JAMES LICK, 473.—Palladium: Sulphur Product of the World, 474.—*Obituary.*—August Breithaupt: G. C. Schæffer, 474.

ERRATA.

Page 11, first note, after 1839, insert 1840, 1842.
Page 26, in title, for H. A. CHASE, read A. W. CHASE.
Page 48, line seven from top, for *Alys* read *Alps*.
Page 147, top line, for Dabken, read Deetken.
Page 170, 23d line from foot, for to LeConte, read one to LeConte and one to Hunt.
Page 172, top line, for LeConte, read Hunt.
Page 265, 9th line from foot, for eastern, read western.
Vol. v, p. 435, 9th line from foot, for ten, read twenty.
